OBJECTIVE

An ambitious fresher with a strong passion for web development, looking for a full-time opportunity to leverage my knowledge of MERN stack. Built a blog website and ecommerce website and gained valuable experience through these fullstack projects. I am seeking a challenging role to further enhance my technical skills, collaborate with industry professionals, and make a meaningful impact in web development projects.

PROJECTS

1. AI Resume Builder | MERN Stack + Google Gemini

- Built a full-stack AI-powered resume builder using the MERN stack with authentication and support for creating and managing multiple resumes.
- Built a real-time resume editor with live preview, supporting customizable templates, accent colors, and structured resume sections.
- Integrated Google Gemini AI to extract data from uploaded resumes and automatically populate editable resume fields.
- Implemented AI-powered professional summary and experience enhancement to generate polished, ATS-friendly content.
- Added resume download and public sharing via unique links, allowing users to publish and their resumes.

2. Real-Time Chat App | MERN Stack

- Engineered a full-stack real-time chat application using MERN stack with secure authentication.
- Integrated Socket.IO WebSockets for low-latency, real-time messaging.
- Integrated Cloudinary for image storage, allowing users to exchange images along with chats.
- Built real-time online/offline presence tracking, users can view the current availability status of other users.
- Implemented profile management functionality, enabling users to update their name, profile picture, and bio, with profile data persisted in MongoDB.
